VAiOS PS XTR EXIT TERMINALS

Convenience in choosing

VAiOS PS XTR is the name of the exit terminal manufactured by the Bulgarian manufacturer VAiOS. This is the base name of the product line of output terminals. All types of terminals can be found on the pages at the end of the description.

The capabilities of the VAiOS output terminal are similar to those of the input terminals. What are the ways to control the exit terminal?

- ✓ by tickets: soft or hard;
- ✓ via control cards: at 125 kHz or at 13.5MHz;
- ✓ through a camera for recognizing the car number;
- ✓ through a combined terminal using tickets and cards;
- ✓ through a combined terminal using tickets and a number camera;
- ✓ through a combined terminal using control cards and a number camera;
- ✓ through a combined terminal using tickets, control cards and a number camera;
- ✓ through an intercom system and communication with an operator;
- ✓ by recognizing the QR code of your smartphone.

VAiOS

Security on the way out

The different variants of the VAiOS input terminals assume identical analogues for the output terminals. The convenience of **controlled access and ticketing** is the most popular. At the same time, the options for **a control card** (operating at 125kHz or 13.5MHz) or through a license plate recognition camera give more variability.

The option to use **an intercom system** adds more features when the system is included and controlled by an employee.

VAiOS has developed and successfully implemented in some of its sites **the access control system via QR code**, which is read directly from the screen of your smartphone. This feature brings major benefits to the multifunctional use of the devices in our pocket, which is already widespread and growing in the dynamic digital world.

Terminals with monitor

As with the input terminals, similarly the output terminals have layouts of models equipped with both monitors and touch-screen monitors, which facilitate communication and control of and with the systems.

Below you can notice the different designations of the models equipped with monitors (LCD) or touch-screen monitors (LCD TS), as well as the designations of the different types of system control.

Designation of names for VAiOS exit terminals

- VAiOS PS XTR** Exit terminal (without monitor)
- VAiOS PS XTR LCD** Exit terminal (with monitor)
- VAiOS PS XTR LCD TS** Exit terminal, equipped with a touch-screen monitor.
