

As a manufacturer of VAiOS process automation technology and software, we have developed terminal models for all types of payments. Along with this we have added another method that we believe is the future of payment methods.

## VAiOS PS PMC PAYMENT TERMINALS. THE DIFFERENT ON THE MARKET

The payment terminals developed by VAiOS are distinguished by the following features, which have helped us to stay on the market for over 15 years:

- ▶ terminals with the known functionalities of the payment methods.
- ▶ Terminals with a combination of payment methods according to the customer's wishes.
- ▶ on-line payment method possibility of custom design and branding of the terminal.
- ▶ possibility of custom-made images on the housing of the terminal.
- ▶ equipment manufactured within the EU.

**MY ACCOUNT**

**SUPPORT MODUL**

*The built-in My Account and Support panel provide customers with convenient tools for support request and complaint. In turn, highly skilled hardware production and support teams add peace of mind combined with courteous administrative service and communication.*

## PAYMENT METHODS

VAiOS PS PMC is the name of the payment terminals produced by VAiOS. Depending on the payment methods, the terminals are manufactured in hardware and programmed in software for each customer's preferences:

- ▶ Payment with banknotes and coins with "change back" functionality included.
- ▶ Payment with bank cards - based on the post-terminal principle.
- ▶ Combined method with payment with bank cards and notes and coins.
- ▶ Payment method on on-line platform.

*The on-line platform is software developed on VAiOS. Its installation enables payment of parking services through a personal website of the parking owner, which can be built with a design chosen by the customer.*

## TECHNICAL SPECIFICATIONS
